Aneela Fatima

Wapda Town, Lahore | 03243799340 | aneelafatimawt@gmail.com

Summary

I am a Software Developer focused on building the powerful backend systems that make apps work smoothly. I specialize in the .NET ecosystem, specifically using C# and ASP.NET MVC to create fast, secure, and scalable web and mobile backends. My core expertise lies in designing RESTful Web APIs and managing complex data with SQL Server. I am passionate about writing clean, high-performance code that solves technical problems while ensuring system reliability. Whether it is architecting a new database or optimizing server-side logic, I build robust "engines" that allow applications to grow and perform at their best.

Education

- MSC IT | 2018 | University Of Education, Lahore
- BA WITH COMPUTER SCIENCE | 2016 | Wapda Degree College, Wapda Town, Lahore
- FA WITH COMPUTER SCIENCE | 2014 | Wapda Degree College, Wapda Town, Lahore

Experience

.NET DEVELOPER | GLOBAL SNI PVT. LTD. (GSNI) | JUN 2024 – AUG 2025

- Developed a **full-scale CRM system** covering Leads, Quotations, POs, Invoices, Delivery Challans, and Deployment tracking with strict **role-based access control**, automated notifications, and real-time dashboards.
- Implemented **end-to-end lead lifecycle automation**, including quotation approvals, secure PO uploads by internal users or external Lead POCs, invoice generation, deployment status updates, and email/in-app notifications.
- Enhanced and maintained **Digidoc DMS**, an enterprise document management system with department-based users, permissions, document types, and secure document lifecycle management.
- Designed **interactive dashboards and dynamic reporting**, enabling admin-controlled filters, drill-down analytics, summaries, and daily/monthly/yearly insights.
- Redesigned the **document review and approval workflow**, supporting parallel and sequential reviewers, configurable order, deadlines with auto-progression, and collaborative commenting with real-time notifications.
- Built a **dynamic workflow engine** allowing admins to design document templates via configurable forms and drag-and-drop UI, version workflows, assign access, and enable users to generate PDFs/DOCs.
- Designed and developed a **standalone E-Sign web application** supporting PDF uploads, positional digital signatures, email-based signing, signer status tracking, and **API-based integration** with external systems.
- Implemented **internal proof-of-concept services**, including AI-powered document intelligence using Cohere and a rule-based PDF invoice extraction service with validation, database persistence, and OCR evaluation.

Projects

UPDATED CRM | OCT 2025 – DEC 2025

- Enhanced an existing **CRM system** by implementing **rights-based access control** instead of role-based.
- Designed and developed a **Lead Activity Desk**, providing a unified 360° view of each lead, including quotations, POs, invoices, deployments, and queries in a single page.
- Enabled allowing **external Lead POCs** to upload POs, update deployment status, raise product queries, and communicate directly with CRM users via **shareable links**.
- Updated the reporting system using **Fast Reports** and **redesigned** the dashboard to show real-time business data
- Developed a **central service** to handle all system emails automatically using SQL Dependency for instant sending.
- Created a **background service** to track product expiration dates and notify the team before renewals are due.
- Built an **internal chat tool** that uses AI to suggest better responses and **SignalR** for instant Notifications.
- Integrated the **Google API** to automatically pull in details about specific companies into the CRM.
- Created a **downloadable tool** that lets users digitally sign Quotations, POs and Invoices directly from the system.

ARTNEST WEB APP | SEP 2025 – NOV 2025

Solo project where I worked as **Developer & Tester** for an online store selling art products such as paintings, resin art clocks, handmade frames, and décor items. Developed full-stack features using **React.js, Node.js, and MySQL Workbench** with product listings, cart handling, and order workflow using user permissions.

TUTORS WORLD WEB & MOBILE APP | JAN 2026 – CONTINUE

Developing a comprehensive learning ecosystem **using ASP.NET MVC and MVC CORE Web API** to manage the full lifecycle of student-tutor engagement, a secure, multi-role architecture with Identity-based RBAC and custom API logic to handle complex hiring workflows and parent-led progress monitoring. Optimized the backend infrastructure for cross-platform integration, ensuring seamless data flow between the mobile interface and the centralized SQL Server database.

Skills

- HTML/CSS/ Bootstrap
- C#/Ajax/SQL
- Flutter/Kotlin
- JavaScript/JQuerry
- ASP.Net MVC/Core/WebAPI
- React/Angular/Node.js
- Window Service .Net Framework
- Blazor Web Assembly Standalone App
- WPF (Windows Presentation Foundation) App

Personal Info

Father Name: Baseer ur Rehman **Date Of Birth:** 1997 **Gender:** Female **Religion:** Islam

Nationality: Pakistani **Marital Status:** Single **Languages:** English, Urdu, Punjabi
