ANEELA FATIMA

Software Developer

0324 3799340 | Wapda Town, Lahore | aneelafatimawt@gmail.com

SUMMARY

I am a Software Developer focused on building the powerful backend systems that make apps work smoothly. I specialize in the .NET ecosystem, specifically using C# and ASP.NET MVC to create fast, secure, and scalable web and mobile backend. My core expertise lies in designing RESTful Web APIs and managing complex data with SQL Server. I am passionate about writing clean, high-performance code that solves technical problems while ensuring system reliability. Whether it is architecting a new database or optimizing server-side logic, I build robust 'engines' that allow applications to grow and perform at their best.

SKILLS

- HTML/CSS/ Bootstrap
- C#/Ajax/SQL
- Flutter/Kotlin
- ASP.Net MVC/Core/Web API
- React/Angular/Node.js
- Window Service .Net Framework
- Blazor Web Assembly Standalone App
- JavaScript/JQuerry
- WPF (Windows Presentation Foundation) App

PROJECTS

MULTI TEANENT INVENTORY MANAGEMENT SYSTEM, 03/2026 - Continue

A Multi-Tenant SaaS platform that manages independent businesses through subscription-based access, automatically disabling database services for tenants when their plans expire. It features a RBAC system where the Owner manages tenants, Admins scale their organizations by adding staff and products, and Staff are restricted to inventory operations.

ART STUDIO– FULL-STACK ART MARKETPLACE, 02/2026 - Continue

Successfully migrates a digital commerce platform from a React.js/Node.js stack to a high-performance **ASP.NET MVC and SQL Server** environment, prioritizing server-side stability and data integrity. I engineered the complete end-to-end customer journey, developing dynamic galleries, a secure multi-step checkout, and a high-performance shopping cart system. To enhance operational transparency, I integrated an advanced real-time **order tracking system** with automated status updates. Additionally, I designed a customized **Rights-Based Access Control (RBAC)** system to facilitate secure, distinct workflows for both administrative managers and end-users, while optimizing the backend for clean code and high-traffic scalability.

TUTORS WORLD WEB & MOBILE APP , 01/2026 - Continue

Developing a comprehensive learning ecosystem using ASP.NET MVC and MVC CORE Web API to manage the full lifecycle of student-tutor engagement, a secure, multi-role architecture with Identity-based RBAC and custom API logic to handle complex hiring workflows and parent-led progress monitoring. Optimized the backend infrastructure for cross-platform integration, ensuring seamless data flow between the mobile interface and the centralized SQL Server database.

EXPERIENCE

ENTERPRISE CRM & OPERATIONS MANAGEMENT SYSTEM

Role: Backend Developer | **Context:** Developed for a private client

- Optimized security by transitioning from traditional role-based logic to **Rights-Based Access Control (RBAC)**, allowing for precise, permission-level authority management.
- Architected a **360° Lead Management View** that consolidates quotations, POs, invoices, and deployments into a single-page interactive interface.
- Developed a secure system using **shareable links** that enables external Lead POCs to upload POs, track deployment statuses, and communicate directly with the team.
- Overhauled the reporting infrastructure using **Fast Reports** and redesigned the dashboard to visualize real-time business metrics and KPIs.
- Built a centralized mailing service utilizing **SQL Dependency** to trigger and send system emails instantly upon data changes.
- Created a dedicated **background service** that monitors product expiration dates and issues automated alerts to ensure timely contract renewals.
- Integrated an internal chat utility leveraging **SignalR** for real-time messaging and **AI-driven response suggestions** to streamline user interactions.
- Implemented automated data enrichment by integrating **Google APIs** to pull real-time company profiles and details directly into the CRM database.
- Developed a downloadable tool enabling users to apply **digital signatures** to Quotations, POs, and Invoices directly from the system interface.

STANDALONE E-SIGN & DIGITAL SECURITY APPLICATION

Role: Lead Developer | **Context:** Independent project for online integration

- Designed and developed a dedicated web application for **positional digital signatures**, allowing users to upload and sign PDFs at specific coordinates.
- Built a comprehensive **signer status tracking** system with automated email-based signing workflows.
- Developed a robust **integration API**, allowing external systems to trigger signing requests and retrieve signed documents programmatically.

AI-POWERED DOCUMENT INTELLIGENCE SERVICE

Role: Backend Developer | **Context:** Innovation & Proof-of-Concept

- Developed a service for **automated invoice extraction** using OCR evaluation and rule-based validation logic.
- Integrated **AI-driven document intelligence** (using Cohere) to enhance data accuracy before database persistence.
- Optimized the extraction pipeline to handle high-volume document processing with real-time validation checks.

DIGITAL DOCUMENT MANAGEMENT (DMS) & WORKFLOW ENGINE

Role: Full Stack Developer | **Context:** Enterprise-grade project for a client

- Enhanced a secure **Document Management System** featuring department-based permissions and comprehensive document lifecycle tracking.
- Designed a **dynamic workflow engine** with a drag-and-drop UI, allowing administrators to create configurable document templates and versioned workflows.
- Redesigned approval logic to support **parallel and sequential reviewers**, including automated progression based on deadlines and collaborative real-time commenting.
- Enabled automated **PDF/DOC generation** through configurable forms integrated into the workflow engine.

EDUCATION

MSC IT
University Of Education - Lahore, 08/2018

BA: Computer Science
Wapda Degree College - Wapda Town, Lahore, 09/2016

FA: Computer Science
Wapda Degree College - Wapda Town, Lahore, 09/2014

LANGUAGES

English
Full Professional

Urdu
Native or Bilingual
